

Thermal

The advantages of cameras in the thermal series are apparent: they don't depend on light conditions, provide constant imaging any time of day, and can penetrate haze and fog. They're your all-weather, all-area, round-the-clock heat detector that can spot fire, monitor temperature, and even catch camouflaged people and vehicles when entering areas considered off-limits.

DH-THERMAL-3-V2

Thermal/Optical Bi-Spectrum Fixed Lens Dome/Turret Camera

Ideal for fire detection, temperature monitoring, and security surveillance, this 5MP Thermal camera can detect, alert and provide **Thermal** complete situational awareness in the most challenging environments. The DH-THERMAL-3-V2 incorporates an optic lens and a thermal module, allowing operators to monitor small areas in total darkness, glaring light, and adverse weather by combining thermal and visible light images. Equipped with our DDA™ Analytics (Detect, Distinguish, Alert) and active deterrence mechanisms (white strobe light and speaker), the DH-THERMAL-3-V2 delivers a strong and impactful tool for any installation.
